A Short Biography

Since graduation from the University of Sheffield in the United Kingdom, I endeavour to develop my professional career as a practicing researcher and educator in the advanced nursing practice field. My current role is a complex of applying the principles of Evidence-Based Practice (EBP) into nursing care delivery and assessing the extent of nursing adherence to standardized guidelines and protocols within their daily practice. While the primary concern of my research is developing the bases of nutritional care in the critically ill in Jordan, other educational and professional developmental focuses are also undertaken. Recently, I commenced some roles in the postgraduate program in nursing which has enabled me embarking with the advanced level of teaching, supervision, research, and examination. This has also enhanced my potentials to elaborate in the competency-based learning along with approaching new skills and characteristics reaching to the desired level of innovation and origination.
